Enactment of this legislation could result in an ongoing \$1 million transfer beginning in FY 2027 from Correctional Health Services to the newly created Inmate Medical Treatment Restricted Account. This transfer reflects savings generated by the implementation of a capped reimbursement rate for noncontracted inmate medical care at the University of Utah. Enactment of this legislation could reduce the University of Utah Sales and Services revenue by \$1 million due to the new capped reimbursement rate.

Enactment of this legislation could cost the Division of Finance of \$1,900 one-time in FY 2026 and \$900 ongoing beginning in FY 2027 from the General Fund to establish and maintain the new Medical Treatment Restricted Account. Enactment of this legislation could also divert approximately \$1 million in ongoing savings due to the capping of reimbursement to providers to the new Medical Treatment Restricted Account created in the legislation.

Notes on Notes

Fiscal explanations estimate the direct costs or revenues of enacting a bill. The Legislature uses them to balance the budget. They do not measure a bill's benefits or non-fiscal impacts like opportunity costs, wait times, or inconvenience. A fiscal explanation is not an appropriation. The Legislature decides appropriations separately.
